

# Cough Pills

## Damaged Bug

The operation's the same every night  
The population is so full of life  
We see you  
There in the park, near those families We monitor and we do it right  
Prying vision that conquers the night  
We see you  
Laying there and breathing through your mouth You aren't as worthless as you often think  
It's the medication you keep under the sink  
That keeps you  
Scared and sterile, closed off to your mind The operation's the same every night  
The population is so full of life  
We see you  
There in the park, near those families
