Good for Nothing

Stiff Little Fingers

You're good for nothing so watch your P's and Q's
Best keep your nose clean and play it by our rules
Mind your way and don't make waves
And you'll get used to knowing you're no useYou're good for nothing you only waste your time
Be a good neighbor and get back there in line
Throw no stones and break no bones
And watch while we pass by on the other sideGood for nothing you're good for nothing
And so you're gonna get nothing for good
You're good for nothing no matter what you do
You'll never make it to get what you want toJust give your best and then take less
There's always someone to get the better of you
Suffer in silence now or else go work for others not yourself
Don't make no noise don't make no fuss
'Cause then you're the others you're working for are us
