

A Few Steps Back

Kyle Burke

00:01

I did it wrong. I did it wrong again. What does it, take.

00:15

To get it right, the wrong words and a moment of, weakness,

00:26

We can't take back, what we said tonight, when did work start taking this shape tiny diggers cuttin love away
something wrong we need to

00:41

figure it out placing the blame won't fix it now, open your heart and let that hurt drift out

00:56

Baby, relax, let's take a few steps back,

01:05

01:21

We had it all. We had it all back then, crazy in love

01:26

In love, and the best of friends, we had our fights and lost a little sleep, but never lost track.

01:40

Of the important things, like speak a little softer, listen better, bend a little farther. I think we'll get it.
somethingâ€™s wrong, we, need, to, figure it out

01:55

Placing the blame won't fix it now. Open your heart and let the hurt drift out.

02:10

Baby Relax, just take a few steps, strip it back strip it back to what we need, all the reasons we still believe it's
not that far

02:25

Its not out of reach, open your heart

02:33

And let that hurt drift out, baby relax, letâ€™s take a few steps

02:44 back

02:49

Can't you see itâ€™s You and me.

03:01

Let's take a few steps back
