# Hope Springs Eternal

## Mixtapes

Pictures of you race across my mind
Filling all the space there is to find
Melting love's own ice that lay so frozen
I give that sacrifice for feeling chosen
So if I face another day without you next to me
I'll lock you in my mind and wish away the key
CHORUS
Hope springs eternal when you're near
All the passion reappears
All emotion seems so strong
Hope springs eternal thru your eyes

Draws me closer to your side
And keeps me there where I belong
Given back the trust that was so fleeting
Captured by one my heart was seeking
Taken to my destiny's horizon
Searching for the moon we see it rising
And in the silence of the night, I hold you next to me
Feeling dreams take flight, they set the spirit free
CHORUS
