

Days Without Paracetamol

Snow Patrol

When summer falls asleep
And winter plucks your strings
The colder that you get
Makes you feel at home Build it up, build it up
Build it up, build it up
Build it up, build it up
Build it up, build it up Build it up, build it up
Build it up, build it up
Build it up, build it up
Build it up, build it up If I come round there now
Would you be pleased to see me
I wouldn't make much noise
Just whimper to myself Build it up, build it up
Build it up, build it up
Build it up, build it up
Build it up, build it up Build it up, build it up
Build it up, build it up
Build it up, build it up
Build it up, build it up My head hurts more each time
The drinking strangles me
Believe in God, like hell
Believe in hell, by God Build it up, build it up
Build it up, build it up
Build it up, build it up
Build it up, build it up Build it up, build it up
Build it up, build it up
Build it up, build it up
Build it up, build it up
