Half The World

Marillion

When you're driving through the city
I hope all your lights are green
And the boy you choose to live with
Well, I hope he's never mean
When you stop a while to think
I hope your thoughts don't drag you down
When you've had too much to drink
I hope the room don't spin around
You're a girl half the world could fall in love with
Doo doo doo.
I hope you never get insomnia
And all your dreams are sweet

And that everybody smiles at you
When they see you on the street
I hope you think about me sometimes
But not enough to cause you pain
And someday that we can say we're friends again
You're a girl half the world could fall in love with
You're a girl half the world could fall in love
Could fall in love with
Doo doo doo.
You're a girl half the world could fall in love with
Half the world could fall in love
You're a girl half the world could fall in love with
