

# Half The World

## Marillion

When you're driving through the city  
I hope all your lights are green  
And the boy you choose to live with  
Well, I hope he's never mean  
When you stop a while to think  
I hope your thoughts don't drag you down  
When you've had too much to drink  
I hope the room don't spin around  
You're a girl half the world could fall in love with  
Doo doo doo.  
I hope you never get insomnia  
And all your dreams are sweet

And that everybody smiles at you  
When they see you on the street  
I hope you think about me sometimes  
But not enough to cause you pain  
And someday that we can say we're friends again  
You're a girl half the world could fall in love with  
You're a girl half the world could fall in love  
Could fall in love with  
Doo doo doo.  
You're a girl half the world could fall in love with  
Half the world could fall in love  
You're a girl half the world could fall in love with
