One More Day

Rising Gael

Canceled compassion, this our ignorance
Not everlasting much less eminent
Stay time heals everything
One more day to regret
One more day to regret
In my eyes I see free deliverance
Not ever lasting such is punishment
You take me higher
Then the lowest place yet
One more day to regret
One more day, one more day
One more day to regret
One more day to regret
One more day to regret
One more day, one more day
You take me higher
One more day to regret
Then the lowest place
You take me higher
Then the lowest place
You take me higher
Then the lowest place yet
Canceled compassion
This our ignorance
Not everlasting
Much less eminent
Stay time heals everything
One more day to regret
One more day to regret
One more day, one more day
One more day to regret
One more day to regret
One more day to regret
One more day, one more day
You take me higher
One more day to regret
Then the lowest place
You take me higher
One more day, one more day

Then the lowest place
You take me higher
One more day to regret
Then the lowest place yet
One more day, one more day
One more day to regret
One more day to regret
One more day to regret
