Heart Miles

[Jai Waetford](#)

My system failing
My heart in coding
Your name is on my screen
But it's not responding
Trying to reach you
But these keys can't feel you
What are you to me?
Real lies fold truthI'm loving all this thought
That you might be the one
Who gives me all the things that no one else could ever thought to
But if were being real now
Should I really trust you?
What is there to lose?What is love?
Baby don't hurt me
Baby don't hurt me
No more (x2)You are drifting away
You're too far
Maybe one day
Our two hearts won't be miles awayMy systems failing
My hearts in coding
The message that you bring
Is getting overloading
You're so far but so close
I see your face in windows
This is the life I lead
I guess only god knowsI'm loving on the thought that you might be the one
Who gives me all the things that no one else had ever thought too
But if were being real now
Should I ever trust you?
What else is there to lose?What is love?
Baby don't hurt me
Baby don't hurt me
No more (x2)You are driving away you're too far
Maybe one day
Our two hearts won't be miles away (away)
