

Speak In Tongues

Ferras

Everything's different
Something's gone missing
I'd travel the distance to drown out the sound of the noise we make
We talk the same shit
Expecting to shape shift
But we just jump ship, and swim in the wreckage of what we say
How do we get to the naked truth
'Cause I got nothing if I don't got you
What have I got
What have I got
What if we've got nothing else to lose
The only thing left for us to do
Is turn the lights out No more words
I want to speak in tongues
No more words
Talk to me with your touch
Body vibration is our heart to heart
No conversation's a good place to start
No more words
I want to speak in tongues You never listen
And I play the victim
Why don't we shut up
Come undone, and change who we both become
I fire weapons
You put up resistance
Either one of us bends and we end this,
or end up just enemies
How do we get to the naked truth
'Cause I got nothing if I don't got you
What have I got
What have I got
What if we've got nothing else to lose
The only thing left for us to do
Is turn the lights out No more words
I wan to speak in tongues
No more words
Talk to me with your touch
Body vibration is our heart to heart
No conversation's a good place to start

No more words
I want to speak in tonguesIn a bed of silence
I gonna read you
In the voice of stillness
I'm gonna steal you
Feel you
Heal you
And turn the lights outNo, no
I want to speak in tongues
No more words
Talk to me with your touch
Body vibration is our heart to heart
No conversation's a good place to start
No more words
I want to speak in tongues
