

Little

Seven Places

In a little while I will go for you, in a little while I will bleed for you.

In a little while I will hang for you, in a little while I will call for you.

You, I only want to spend my time with you.

I cracked my skin so I could be with you.

I made the world to stop it just for you, I want to be with you.

There's a little place that I will build for you.

There's an empty space that I will fill in you.

You, I only want to spend my time with you.

I cracked my skin so I could be with you.

I made the world to stop it just for you, I want to be with you.
