

# The Moon World

## SHONEN KNIFE

Take me to the moon when it's very blue  
I think I've read too many science fictions  
    The moon world, the huge computer  
        On the teleguided beam  
    The moon world, I've been dreaming  
My thought systems are about to burstI won't suffocate without oxygen  
    What a wonderful place  
    I won't be held down by gravity  
        What a nice place
