Get Down

Rocket from the Crypt

Advisory - the following lyrics contain explicit language:

Last chance to get rich off this shit
That makes me sick
You think you've seen it all, yeah
You haven't seen shit, you moronCome on, you better look behind your back
You better turn around, you better turn around, you better turn around
You better say, "Who's fault now, who's fault now, who's fault?"
You better get down before the heat starts to burn and make you meltLast chance to get fucked off this shit
That we can't trust
You think you've seen it all, yeah
You're gonna see it again you moronYou better look behind your back
You better turn around, you better turn around, you better turn around
You better say, "Who's fault now, who's fault now, who's fault?"
You better get down before the heat starts to burn and make you melt
