Strength In Numbers

The Music

The emptiness that burns inside See how they run, see how they hide

All the animals come out at night

All the animals come out at nightJust a slave to the city

To indulge in the pity

The opaque substitution

For a real revolutionStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usThe human use of human beings

With dead emotions you fail to see

The adrenaline, it burns a hole

The adrenaline, it burns a holeJust a slave to the city

To indulge in the pity

The opaque substitution

For a real revolutionStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers

No one will come between us

Strength in numbers

No one will come between usStrength in numbers
No one will come between us
Strength in numbers
No one will come between us
