I feel it
Stop, drop, roll, get up, take a crack at me
You look at me, you look at me
Like every other motherfucker that I've seen today
You wanna hurt me like I've never been hurt, right now
Feel it now, stop
Come again now
Feel it right now
Show me just one thing
To help me make the day stop moving slowly
Show me the only thing
That'll make you stop controlling then you'll see how
Now give up every second for the one shot left in me
You look at me and now you see
How I took the real from you, fucker 'cuz you had so much to say
You wanted me, you got me right here, right now
Feel it now, stop, drop again now
See it right now, I'm coming in
Why can't you just
Show me just one thing
To help me make the day stop moving slowly
Show me the only thing
That'll make you stop controlling
Why can't I just start over?
It's like I'm rolling over
Don't wanna be the one to bleed, not me
It's like I'm mourning over the death of me, no
It's like I'm rolling over
Not me, not me, not me, not me
Show me just one thing
To help me make the day stop moving slowly
Show me the only thing
That'll make you stop controlling
