

Odyssey

Kiss

From a far off galaxy
I hear you calling me
We are on an odyssey Through the realms of time and space
In that enchanted place
You and I come face to face Once upon not yet
Long ago, someday
Countless times we've met
Met along the way Through the luminescent night
On beams of neon light
You and I in winged flight As we cross the starry sea
Powered by what we see
Now and then, the victory Once upon not yet
Long ago, someday
Countless times we've met
Met along the way There's a child in a sun dress
Looking at a rainy sky
There's a place in the desert
Where an ocean once danced by There's a song in the silence
Weaving in and out of time
We are notes in the music
Searching for remembered rhyme On a mountain high, somewhere
Where only heroes dare
Stand the stallion and the mare We have been and we shall be
Each other's destiny
One another's odyssey Once upon not yet
Long ago, someday
Countless times we've met
Met along the way Met along the way
Met along the way
