

# Shinedown

## Unity (Matisse & Sadko Remix)

A little more than life's been wasted  
Since you went away, nothing's changed  
We stick together, it won't last forever  
So why is there so much pain?

I can't explain

This war I fought without you  
It's all in my head, well step aside

And succumb

The last time was free, yeah

[Chorus] Give the times, it's never gonna change

I've made up my mind, I still feel the same

Release me from a life without pain

Shine down your light on me

Give the times, it's never gonna change

I've made up my mind, I still feel the same

Release me from a life without pain

Shine down your light on me

One million

Short of a billion

I can't speak if you won't listen

There's no-one, no way I'm falling down without you here

Lift off the stain I wear and graph this state of mind

[Chorus] Give up cause my mind is made

I can't feel the same

If there ain't nothing changed

[Chorus]
