

Over And Over

Santana

Watcha gonna do with your life
Now that Im leaving
Are you believing
Youll make it on your own Didn't you believe what I said
Or was it just madness
Living in sadness
Youll be all alone I said it over and over
At least a hundred times
I have what you've been missing
Look back and you may find Now its time to walk out the door
Im looking ahead now
Its all been said now
Time to be moving on Yes, I told you so many times
But you didn't listen
You cant see what youre missing, yeah
What you never had before I said it over and over
At least a hundred times
I have what you've been missing
Look back and you may find I could have loved you
Like there was no tomorrow
It didn't really matter
If you stole my love or borrowed You know I could go crazy
I just cant remember
Exactly how to go there
And keep this love forever I said it over and over
At least a hundred times
I have what you've been missing
Look back and you may find I said it over and over
At least a hundred times
I have what you've been missing
Look back and you may find I said it over and over
At least a thousand times
I have what you've been missing
Look back and you may find, yeah (Over and over)
I said it over, over, over and over, yeah
(Over and over)
I have what you've been missing (Over and over)
Over and over
(Over and over)

Look back and you may find
