One Minute

Krewella

Stay here, see me come undone
Set free my soul and turn me on
Lay me down and stop the time
So long now leave the world behind
We got one minute, you know there's no other
Its too late we're in it, you're blowing my cover
Take me to heaven and back in a second
Light up this fire before you come rushing
We got one minute you know there's no other
Its too late we're in it, you're blowing my cover
Take me to heaven and back in a second
Light up this fire before you come rushing
St-st-st-stop the time,
So long, now leave the world behind
G-g-g-get me on the rise,
Get me, get me on the up and up
When I'm fresh and cry, baby you aint goin' rough enough
I'm your kitty girl and your back is like my scratching post
C'mon make me scream, like I-like I-like I- seen a ghost
Drink up I'm soaked
I'm like the dopest dope you've ever smoked
The-the-these feelings you evoke
I only need one minute 'til I get you in a stroke
Stay here, see me come undone
Set free my soul and turn me on
Lay me down and stop the time
So long now leave the world behind
We got one minute, you know there's no other
Its too late we're in it, you're blowing my cover
Take me to heaven and back in a second

Light up this fire before you come rushing
We got one minute, you know there's no other
Its too late we're in it, you're blowing my cover
Take me to heaven and back in a second
Light up this fire before you come rushing
St-st-st-stop the time,
So long, now leave the world behind
Look into my eyes

Say you never gonna give it up
Try'na get my prize,
It aint yours until I get enough
Boy I got your fun: you're like
'when it rains it really pours'
Know my body rocks
whatcha whatcha
whatcha waitin' for ?
Drink up I'm soaked
I'm like the dopest dope you've ever smoked
The-the-these feelings you evoke
I only need one minute 'til I get you in a stroke
We got one minute, you know there's no other
Its too late we're in it, you're blowing my cover
Take me to heaven and back in a second
Light up this fire before you come rushing
We got one minute, you know there's no other
Its too late we're in it, you're blowing my cover
Take me to heaven and back in a second
Light up this fire before you come rushing
