

Shadows on the Barley

Marillion

Storm clouds cruising cross the blue skies
Shadows float across the fields of barley
I find myself an island in an island
I have to sort things out just my way And all I find is my bar
To laugh, to me I say
Like all you know is true
Is for every time we know it's mine I saw clouds cruise floating cross the blue sky
Shadows float across the fields of barley
Hero down the right way
Everything will come out my way Now I know, I see, I find
It's the only way I ever felt the way I do today
All I say, I play the game
I know I never could be sure of all the places that I've seen Clouds cruising cross the blue skies
Shadows float across the fields of barley
Every self an island in an island
Working every problem out my way Now I see, I feel, I know
It's the only way that anything could sort out to the way
I say you'll find it's out of mind
It's the only way I could have been
It's the only way I stand Clouds cruise
Float upon the barley
