

Nature Feels

Frank Ocean

I've been meaning to fuck you in the garden
Breathing so hard, we both could use the oxygen
Just hop on my back, I'll take you down the stairs
Into my backyard and lay you on the grass[Chorus]
Give it you over again, over again over again
Over again over again, over again over again
Making love, underneath the cherry leaves
Baby girl, tell me how my nature feels
Said oh baby, up against the cherry tree
Baby girl, I'll give it to you naturally, naturally
Feeling like Adam when he first found out this existed
Me and my Eve trying out our first positions
And it's all good, and it's all free, and it's all you, and it's only me
Playing in the dirt wrestling myself inside you[Chorus]
