

# Speak In Tongues

## Central Services

You can't keep me caged up forever!

You can't tame me forever

Now who knows how long

We fight for freedom

But no ones ever won

was a systematic or automatic

Annihilation of every nation

Until we find ourselves

Fighting all alone

When everything just falls away

I'll see you in the pain this time

When everything just falls away

And I'll see you fallen too

Now who knows how come

We pledge allegiance

and then we pull out guns

was a diplomatic or democratic

A violation of demonstration

until we find ourselves

standing all alone

(Chorus)

And I'll see you... fall... away

And you can watch me walk away

And you can watch me walk away

(In the end we will demonstrate, what would mean then when we create)

And you could watch me walk away

When everything just falls away
