## In the Cold

## **Acceptance**

And the words they take their meaning

(It's all you said)

And the flame, it loses color

(It's all you said)

Take, take, take a while, take a while

(It's all you said)

Take, take, take a while, take a while

(It's all you said)Knowing that it's far from over

This one belongs to youTime shows us that all that ever mattered

All that ever mattered leaves us in the cold

If you ever believe this is what you need

It will spin around and shatter

Throw you to the floor as it leaves us in the coldAnd the dream you think I'm making

While the house I built is breaking

(Breaking)

Take, take, take a while, take a while

(It's all you said)

Take, take, take a while, take a while

(It's all you said) Knowing that it's far from over

This one belongs to youTime shows us that all that ever mattered

All that ever mattered leaves us in the cold

If you ever believe this is what you need

It will spin around and shatter

Throw you to the floor as it leaves us in the coldI remember the train you came in on, everything I want kept calling

I remember the chill that came over, everything I loved went falling Time shows us that all that ever mattered

All that ever mattered leaves us in the cold

If you ever believe this is what you need

It will spin around and shatter

Throw you to the floor as it leaves us in the coldTime shows us that all that ever mattered

All that ever mattered leaves us in the cold

If you ever believe this is what you need

It will spin around and shatter

Throw you to the floor as it leaves us in the cold
