Up and Gone

Tab Benoit

Standing in the doorway speaking your mind
And then you're out the door, leaving me behind
And every time something goes wrong
You're up and goneYou know I surely, surely would love to know
Where you go when you walk out that door?
You know I would wait all night long
For you to come homeOh yes I surely, surely would love to know
Where you go when you walk out my door?
Lord, every time something goes wrong
You're up and gone
