

# Up and Gone

## Tab Benoit

Standing in the doorway speaking your mind  
And then you're out the door, leaving me behind  
And every time something goes wrong  
You're up and gone You know I surely, surely would love to know  
Where you go when you walk out that door?  
You know I would wait all night long  
For you to come home Oh yes I surely, surely would love to know  
Where you go when you walk out my door?  
Lord, every time something goes wrong  
You're up and gone
