Highland

Asturias

Looking out and I'm wondering where I am
While I'm stuck in the daily traffic jam
I decide to get out and leave the world behind me
Everywhere there are people passing by
Empty faces and not a friendly smile
Under stress, loneliness, a part of our city
Now I finally have decided
I will leave it all behind
And discover something better
And l know where I will find
Find a place of harmony, of laughter and of dreams
It you want me, that is where I'll be
I'll be waiting on the Highland
With its wonderful serenity
Where the stars glow and the brooks flow
That's my way of life
On the mountains on the Highland
And the nature is surrounding me
When the wind blows
That's all I need, all I need
On the highland when I was a child
l would play with my friends and we were wild
And we all loved the moors, the nature and it's freedom
And we looked for ghosts out in the mist
l remember the first time I got kissed
By the shy neighbour guy, who whispered "be my girlfriend"
But I longed for some excitement
So l travelled 'round the world
After that I seattled down and

l became a city girl
Went out dancing every night and lived intensively
Now l know it's not a life for me
I'll be waiting on the Highland
With it's wonderful serenity
Where the stars glow and the brooks flow
That's my way of life
On the mountains on the Highland
And the nature is surrounding me

When the wind blows
that's all I need
On the Highland, on the Highland, you will see
If you join me I can promise
You'll stay until eternity
I'll be waiting on the Highland
With it's wonderful serenity
Where the stars glow and the brooks flow
That's my way of life
On the mountains on the Highland
And the nature is surrounding me
When the wind blows
that's all I need
On the Highland
Cause its my land
You'll See
On the Highland
On the Highland
