Virtual Reality

Joan Armatrading

Searching for the trigger words
Looking for ties to bind you
Trying to build a destiny
You can't let fate decide it
This dream cannot be denied
Like you can't deny the painAll around you
All is fantasy
An endless day of screens and virtual reality
And all you wanna do isGet right back in the arms of real life
You wanna get right back in the arms of real lifeYou've been searching for life in all the wrong places
Like in cyber space and network bars
You gotta get right back in the arms of real lifeYou gotta get right back in the arms of real lifeEverybody looking for good friends
But only finding acquaintances
Sometimes not even that
Just other people with a work work balance
Looking for other people skipping work work
Work workWhat just happened
To the life force
All I want
Is all I need
Is all I want
is all I needWho can say the most with less
Acronym your whole life story
Change your name and change your sex
But you can't deny the painAll around you
All is fantasy
An endless day of screens and virtual reality
And all you wanna do isGet right back in the arms of real life
You wanna get right back in the arms of real lifeYou've been searching for life in all the wrong places
Like in cyber space and network bars
You gotta get right back in the arms of real lifeYou gotta get right back in the arms of real life
Gotta get right back in the arms of real lifeGet right back in the arms of real life
Get right back in the arms of real life
