

# That's Where I Went Wrong (US Version)

## The Poppy Family

What's your name?  
I'm so far from my home and I'm tired  
I don't want to be alone and I need  
someone to talk to me  
cause the one that used to talk to me  
well, he don't want me

See this ring  
Tell me what it means to you, yet it's pretty  
but to me it just meant true  
I'm so sorry, for being such a bore,  
cause this ring and everything means nothing anymore

This bus is awful cold, we've gone so many miles  
God please help me go to sleep and forget him for a while  
I know it's not his fault, I've known it all along  
I was the one that trusted him  
That's where I went wrong

This old road  
I don't know where it leads and I don't care  
cause it's not hard for me to see him when it ends  
There'll be nothing there for me cause the only thing I care about  
I've got to live without

This bus is awful cold, we've gone so many miles  
God please help me go to sleep and forget him for a while  
I know it's not his fault, I've known it all along  
I was the one that trusted him  
That's where I went wrong

---
