People Like People Like People Like Us

Backyard Babies

Hey you, you got an error too
to get me out in a blizzard
want a red balloon and it better be blue
need some to stick my head intohey you, watcha gonna do
don't tell me you don't kiss
want a bed and a miss and together with
people like people like people like uspeople like people like people like usall I had to do, is run an arrow through
i know i never miss, not sad not true
we fix it withg glue
thats the reason why I'm stuck with youYeah soon, under the full blue moon
the futures never bright if you
don't have the light to share with
people like people like people like uspeople like people like people like uspeople don't like people like you
people like people like ushey you, you think you're talking to
what you gotta find is a superstitious fear of
people like people like people like uspeople like people like people like us
