Sidewalk Safari

Chairlift

All of the bones in your body Are in way too few pieces for me Time to do something about it If you know what I meanI'm on a sidewalk safari If I see you on the street you'd better run Away from my all terrain weapon In your directionIn your direction In your direction In your directionI'm on a sidewalk safari If I see you on the street you'd better run You should have taken a taxi In your direction'Cause I'm gonna run you down In your direction I'm gonna hunt you down In your directionI'm gonna run you down In your direction I'm gonna hunt you down In your directionMmm I'm bad with bows and arrows I'm not so good at guns Poison seems old-fashioned And hired help's no fun But I do know how to drive a car Faster than a man can run'Cause I'm gonna run you down In your direction I'm gonna hunt you down In your directionI'm gonna run you down In your direction I'm gonna hunt you down In your direction
