The End Of All Things To Come

Mudvayne

All over with
Fuck all the flags, the greed, the world leaders
Run for the fence
We're coming, we're killing, we're changing the faces
Believe in yourself
Let go of ego, strengthen within yourself
All over with
We're coming, we're killing, we're changing the faces
I'm killing every fucking thing
Until somebody gets this fucking point
The point I'm trying to make
I lead, the mice on parade
Down to the river of kool aid
And open up the flood gates
I need a barrel of cyanide
A pile of strychnine
Until the whole damn world is dead
Start over again
All over with
Fuck all the flags, the greed, the world leaders
Run for the fence
We're coming, we're killing, we're changing the faces
Stop talking, negotiating
Your feeble attempts towards world peace
Gimme a fucking break
Need world wide genocide, planetary suicide
And when the whole damn world is dead
There's your fucking peace
All over with
Fuck all the flags, the greed, the world leaders
Run for the fence
We're coming, we're killing, we're changing the faces
Believe in yourself
Let go of ego, strengthen within yourself
All over with
We're coming, we're killing, we're changing the faces
Oxygen wasters
Come on
We've come to save you

To save you from yourselves
Kill or be killed
We've come to save you
To save you from yourselves
Kill or be killed
All over with
Fuck all the flags, the greed, the world leaders
Run for the fence
We're coming, we're killing, we're changing the faces
Believe in yourself
Let go of ego, strengthen within yourself
All over with
We're coming, we're killing, we're changing the faces
