

# Perfect

## Emanny

Perfect-Emanny

You ever had a candle light dinner with the woman that you love?

She got a glow on her and it's lookin' like it's comin' from above

You eva stared at an angel in the face?

Problem happened anyway, you gotta stall, you gotta hiss

Have the prettiest face I've seen in a while

Just wanna keep you smilin', babe

People spend their lifetime tryna find what I got by my side

People waste their time tryna find the shiniest dime, I found mine

Baby, baby, you are better than a model or a movie star

Perfect to me, you're are (you are perf...)

You ever made love on a cloud warmed up by the sun?

And you don't wanna come down, trust me, you are not the only one

You ever felt gravity gradually go slow? No

Didn't think you did baby, I'm thinking that I'll give you your freedom

And let you fly back if you want to, baby

People spend their lifetime tryna find what I got by my side

People waste their time tryna find the shiniest dime, I found mine

Baby, baby, you are better than a model or a movie star

Perfect to me, you're are (you are perf...)

You are love

I'm sittin' here tryna figure out the best way to say this

It's gonna sound a lil bit awkward, I'm awkward sayn the same shit

For you, if you could talk, if fame just could walk

Upon us, that would be you, you you, ah

People spend their lifetime tryna find what I got by my side

People waste their time tryna find the shiniest dime, I found mine

Baby, baby, you are better than a model or a movie star

Perfect to me, you're are (you are perf...)
