Eternal Love

Utopia

When your life gets too lonely
It might help to feel me in your heart
I remember you happy
But thought it unfair that we are apartAnd it's gonna be alright
'Cause everlasting love
Will get us through the nightThere's a new day that's dawning
It brings with it skies, so blue and clear
I can't offer you blue skies
I've only got love, eternal love
Love, eternal loveSoon it's gonna be alright
And the day will come
When we live as oneDrifting through time
On an ocean of eternal love
Sailing through space
On an ocean of eternal loveDrifting through time
On an ocean of eternal love
Sailing through space
On an ocean of eternal love
Yeah they're sailing awayDrifting through time
On an ocean of eternal love
Sailing through space
On an ocean of eternal loveDoesn't love have a meaning
To put that in words would be so hard
Just remember the feeling of love in a song
That's a love for realAnd it's gonna be alright
'Cause everlasting love
Will get us through the night
