

Behold a Pale Horse

Angels & Airwaves

And when the time is right
It's gonna change the world
And with the darken sky
There is nothing thru
And there is no more love
Or f*!#@ gates of pearl

I see the seven stars
I see the seven stands
I hear the deathly voice
I count the sense we have
I am the living one
I am the first and last

The crowds
The noise
The change in the guard
It's such a strange celebration
Kids, they laugh
As fire it eats up the world
It's such a strange celebration
All our eyes are burned by heaven and Earth
It's such a strange celebration

And they know who we are
The seven angels sing
And several billion die
With the Earth shaking
Yeah they know who we are
And they will set us free

The crowds
The noise
The change in the guard
It's such a strange celebration
Kids, they laugh
This fire it eats up the world
It's such a strange celebration
All our eyes are burned by heaven and Earth

It's such a strange celebration

The crowds

The noise

The change in the guard

It's such a strange celebration

Kids, they laugh

This fire it eats up the world

It's such a strange celebration

All our eyes are burned by heaven and Earth

It's such a strange celebration

The crowds

The noise

The change in the guard

It's such a strange celebration

Kids, they laugh

As fire it eats up the world

It's such a strange celebration

All our eyes are burned by heaven and Earth

It's such a strange celebration
