

# We Got Love

Tom Jones

Something wonderful Something wonderful is happening here  
It's indescribable, don't let it disappear  
Take this moment now before it's lost  
Give yourself away, don't count the cost We got love  
That's all that's real here now  
We got love  
And all we need is now Come and go with me, let's enjoy the view  
Make this day complete, forget your solitude  
This time has come for us so take my hand  
It's written on your face I know you understand We got love  
That's all I feel here now  
We got love  
That's why we're still here now All the weight of the world  
Is a universe away  
It's just you and I  
And the way we feel today We got love  
That's all that's real here now  
We got love  
And all we need is now We got love  
I see it in your eyes  
We got love  
And it's a beautiful sight Something wonderful is happening here  
It's indescribable, don't let it disappear
