

Danger

J.J. Cale & Eric Clapton

Danger, she's out into the night
Danger, she's such a pretty sight
She was treated so badly it seems
Now she's lookin' for a dream
Danger, she's out into the night Danger, she walks the streets alone
Danger, all the boys she don't know
All the men, they look her way
Could be hers, hers today
Danger, she's out into the night Walked into a love affair
Didn't seem going nowhere
With no choice, she thought she might
Now she took the rule right into the night Danger, she walks the streets alone
All the boys she now knows
And all the men, who look her way
Could be hers today Risk she'd take to find someone new
She don't know where or who
She wants to do, doin' it right
She's gone out into the night Danger, she's out into the night
Danger, she's such a pretty sight Danger, she's out into the night
Danger, she's such a pretty sight
Danger, she's out into the night
Danger, she's such a pretty sight
