

Battles

In Flames

Pain

You're not my friend and I despise you

Friend

You are my pain and I adore you What are you waiting for, I'm here

Let's consume it all

Before they take it all away I hear them from the other side

As I sit and let the day go by

Trying to see if the world is still alive

Let the day go by Insane

To be caged, when you're to blame

Blame

Break free from insanity to praise you What are you waiting for, I'm here

Let's consume it all

Before they take it all away I hear them from the other side

As I sit and let the day go by

Trying to see if the world is still alive

Let the day go by What are you waiting for, I'm here

Let's consume it all (let's consume it all)

Before they take it all away I hear them from the other side (other side)

As I sit and let the day go by (day go by)

Trying to see if the world is still alive

Before they take it all away

I hear them from the other side (other side)

As I sit and let the day go by (day go by)

Trying to see if the world is still alive

Let the day go by
