

Canary Island

Houndstooth

Lead me around like you were my shepherd
take me for a drive in your fast machine
bring me to town where the bright lights gleam
just for me it's never been quite right
always taking things to dark inside
a restless mind is hard please

most of the time take me where the road ends, old canary island, take me where the road ends (4x)
I could take the hit if you do the crime
we could lay on eggs out on the line
take a walk on this side for a little while
for a little while you could bring me back like a resurrector
I could risk your touch when your dark eyes gleam
take me where the road ends, old canary island, take me
where the road ends (4x)
