The Other Side

Morphine

Going down to the river, there's a man I wanna see
Yeah, he's the ferryman, he'll recognize me
I'm going down now to the riverside
There's a place I wanna beI'm going to talk to the ferryman
He'll be expecting me
I'm crossing over now to the other side
Life is better there on the other sideThe grass is greener there on the other side
And I I get even there on the other side
And everything will turn out all right
On the other sideI'm crossing over now to the other side
The other side
I walked by the church house late last night
Yea I walked by the church house but I didn't go insideCause I I once slept with the preacher's wife
She handed me a ticket to the other side
I'm crossing over now to the other side
To the other side
