

# Innocence

JLS

Long after home time  
To my friends  
Growing up  
All but a dream now There was nobody else in the whole wide world  
But me and my girl  
It was not long before we knew what it was  
And calling it love But everybody knows how the story goes  
Something in your eyes sent the innocence over now  
Telling me that you found somebody new  
Something in my heart sent the innocence over now  
You know I really loved you more than I could tell you  
Something in the air sent the innocence over now We made vows in the treehouse  
Together, forever  
Little did we know we changed But everybody knows how the story goes  
Something in your eyes sent the innocence over now  
Telling me that you found somebody new  
Something in my heart sent the innocence over now  
You know I really loved you more than I could tell you  
Something in the air sent the innocence over now
