Look Behind You

Saint Vitus

Foggy morning drifting 'round youBlackened hazeYou can't see past your trembling hand Pounding footsteps right behind youEvery dayShadows from an empty manLook behind youEchoed screaming in your earsConstantly

> Reaching for your loaded gun Ringing in forbidden fearsSuddenly

Look behind you as you runLook behind youTurn the corner, dead-end street, you can't go onWhat are you gonna do?

By yourself right from the startEverything was all dreamed up by youYou live in doubtLook behind youLook behind you

Look behind you
