

Little Bird

Eels

Little bird, hopping along my porch
Know it sounds kinda sad but what's it all for?
Right now you're the only friend I have in the world
And I just can't take how very much, goddamn, I miss that girl
Little bird, you look alright
I'm sure it's not easy getting through your night
So tell me this can't be how it's gonna end
Tell me my heart somehow, dear God, it's gonna mend
Little bird, I guess you're right
I can't let it take me out without a fight
But right now I can't see making sense of this world
I just can't take how very much, goddamn, I miss that girl
