

Pride

Kosheen

What you gonna do
When it's time to recognise?
Do you wanna get serious
When you're walking by my side?
And the way is perilous
And you think you're better now
You think you're over it
I can see from the look on your face
You're a long way off
Pride it always comes before a fall You see me
See me calling I can fly
But I watch you falling
You see me, see me calling
I can fly but I watch you falling
Falling Don't fall it's a long way down again
I can see your pretty face
Won't wear the embarrassment
Of falling outta grace
And I think I'm better now
And I think I'm over it
Can you see by the smile on my face?
I'm coming home
Pride it always comes before a fall You see me see me calling
I can fly but I watch you falling
You see me see me calling
I can fly but I watch you falling What you gonna do
When it's time to recognise?
Do you wanna get serious
When you're walking by my side?
And the way is perilous
Well I think we're better now
And I think we're over it
I can see by the look on your face
It's coming home
Pride it always comes before a fall See me, see me
Falling
