

Meet You in the Maze

James Blake

Every friend in need
Every memory, it's me who makes the peace in me
All I wanna sleep with, see
It's me that makes the peace in me

From November through 'til now
I hadn't felt, and I
Weakened, lost and ...
I woke you every now and then
From one of those days
I saw those Northern Lights
I wanted you to see them
I wonder if you'll see them
Or if you'll travel long and find another
Or if you'll find another

I'll meet you in the maze
I'll meet you in the maze
I'll meet you in the maze

All those songs have came before you
All those songs have came before you
All those songs have came before you
They were once awaiting
Music can be everything
Music can be everything
That's why I see you clear as air
And it's not from my creating
Music can be everything
All those songs have came before
All those songs have came before you
They were once awaiting

Music can be everything
I'll meet you in the maze
I'll meet you in the maze

Before you know you've filled the page
Before you fill the page
They were once awaiting

Music can be everything
