Do Something

Pepper

This just in the world is coming to an end
The entire population is exploiting each other one by one
[Incomprehensible]Fire one shot, fire one round
Everyone fire one fifty-one
Now it's time to look at the end of the world
Through the bottom of a glass that's done
'Cause I realize that there's not much time
So we better get this started right now
'Cause if the world does end I want all my friends
To be inside when the ship goes down
Yeah, it's on for this evening, inhale your breathing
Take this as your invite and live your life tonight
People are you ready, the dance is hot in town?
And if the world don't end I say we do this again
'Cause that's what makes the shit go round
Up your system, up to listen
Up your cup, up until you hit the top
And with so much trouble it causes struggle
I guess we might as well give up
But before we go I'm gonna need to know
That we're goin' out with one last blast

'Cause if we come together maybe things will get better
And make over that just might last
It's on for this evening, inhale your breathing
Take this as your invite and live your life tonight
People are you ready, the dance is hot in town?
And if the world don't end I say we do this again
'Cause that's what makes the shit go round
People are you ready, the dance is hot in town?
And if the world don't end I say we do this again
'Cause that's what makes the shit go round
It's on for this evening, exhale your breathing
Take this as your invite and live your life tonight
People are you ready, the dance is hot in town?
And if the world don't end I say we do this again
'Cause that's what makes the shit go round
People are you ready, the dance is hot in town?
And if the world don't end I say we do this again

'Cause that's what makes the shit go round
Fire one shot, fire one round
Everyone fire one fifty-one
