

Promise

Mercy Drive

To me-Another lie
Cause lies are what you're made of
Amuse me-To think that I can't see through what you've become
Now we'll make you a promise
I will promise you
Time will remember and time will find you
And time will turn around everything you've done
You will bend in the end
So now the problem here
Is me or so you say
Distractions-Your way to avoid
The blame that you won't take
And I will make you a promise
I will promise you
Time will remember and time will find you
And time will turn around everything you've done
You will bend in the end
Time will remember and time will find you
And time will turn around everything you've done
You will bend in the end
Time will remember and time will find you
And time will turn around everything you've done
You will burn out in the end
