

Baby Baby

Eighth Wonder

Just because you want my loving
It's not enough to just turn me on
But when you touch me
Oh I really feel it boy
That I don't want to be left alone

I see you're using me
I won't be a fool
So see what you do to me
If you tell me true
I will, I will give my love to you

Baby, baby just give me the real deal
Don't say maybe my heart beats for you
Baby, baby you know how you make me feel
Never maybe I'll give my love to you

Every time I see your picture
I call you up but you're not at home
Now don't you want me or are you playing
Boy you've got me hanging out on my own

You see you're hurting me
I won't play your games
'Cause I've got what you really need
If you have a clue
I will, I will give my love to you

Baby, baby just give me the real deal
Don't say maybe my heart beats for you
Baby, baby you know how you make me feel
Never maybe I'll give my love to you

Are you ready for love
To you ooh
It's alright it's alright
Gonna be your baby
Gonna be your baby boy
Gonna be your baby

I see you're using me
I won't be a fool
So see what you do to me
If you tell me true
I will, I will give my love to you

Baby, baby just give me the real deal
Don't say maybe my heart beats for you
Baby, baby you know how you make me feel
Never maybe I'll give my love to you

I've been ready for love ever since I met you
And now I've had your love I'm very glad I let you
'Cause I've been looking for a lover who can make me feel
The way you do, and now I've found you it's a real deal
I've been playing the field, but I was playing for keeps
And everywhere I seem to look I find a bunch of sheep
Now lamb wolfs clothing is the last thing I need
Honey boy like you are a dying breed,
Ha
Are you a man or a mouse?

Baby, baby just give me the real deal
Don't say maybe my heart beats for you
Baby, baby you know how you make me feel
Never maybe I'll give my love to you

Baby, baby just give me the real deal
Don't say maybe my heart beats for you
Baby, baby you know how you make me feel
Never maybe I'll give my love to you
