Silent Scream

Black Rage

Nightmare, mass depression, silent screams out there
Dammit, into darkness something that'll never rise
Darkness, in this something that the world that follows rhyme
Impetrate, simplest wine, deep within my spine
Silent scream, tearing it up in time
It'll die sucking the part where it'll die
Shout another time, evil hard knock game
Mistake, mistaken, something that's chewing you down
Scared of dangers of light, bury tainted guy
Grain suffers rhyme, hard is something that is destroyed
Silent scream, the worst of the bitterest sound

Evil does the light turn into stow
Light, free of dead, humanity mayday
Destruction to the end show
Preserved the nastiest prey, wake me up and down
Infinity to prey, selection to the later
It brought us the end of the day
Nightmare, mass depression, silent screams out there
Dammit, into darkness, something that'll never rise
Innocent, we're all gonna die
Silent scream, it's the end of light
