

Rollin Around

Jaden Smith

You were all there was when I caught up so you drive away
She caught my love, I can smell you from a mile away
I feel your touch when I wake, and when I go to sleep
I lost your trust, is there really much that I can say?
Yelling at the world telling it to slow down
I'm parked outside your house
Just thinking 'bout the thousand times we made up on the mountainside
Don't give up on me now
Talk or walk when we rolling around
You know I'm new in town, girl
Don't know where I'm at, but I need you around
You move to the sound so twe hit up and down (Fuck)
They laugh I'm not no Clout God, unless I go to Hollywood and I go uptown
You're a diamond in the rough, people look what I found, ooh
I love those moves, to kill it with the juice, mix it all with the music
Play with fire, up in the sky
I'm up every night, we need compromise
You had other guys, but they weren't wise to leave you tonight (Tonight)
When I lie in my bed, you be by my side, tonight
When I'm fly in my head, I get butterflies
She said
