

# Guard You

MIYAVI

Leave you lying in your bed  
Black rain is in my head  
As the sun fills the blue sky  
There is danger on the horizon  
We can't stay to see this war  
So I'll move you to the shores  
Where you'll be so far from homeSa-ku-ra  
Is falling downThis is the way, the way, the way, the way to guard you  
To be far away, away, away from you  
I'll do anything to take away the pain that harms you  
And count every second till the skies are blueNow we have to face our fears  
It might turn our smiles to tears  
But we're right on the front line  
So for now we can't reunite  
I keep dreaming of the past  
But it just never lasts  
How I wish time could go backSa-ku-ra  
Is falling downThis is the way, the way, the way, the way to guard you  
To be far away, away, away from you  
I'll do anything to take away the pain that harms you  
And count every second till the skies are blueKon'nanimono sekai wa hare terunoni  
Ima mo kokoro wa nureta mama  
Afureru namida wa sonomamade ii  
Me o tojireba anokoro ni modorerukaraThis is the way, the way, the way, the way to guard you  
To be far away, away, away from you  
I'll do anything to take away the pain that harms you  
And count every second till the skies are blue
